Over 70 years of tacker expertise

Our in-house research and development centre works tirelessly to make our tools even better. To do so, we draw on more than 70 years of experience from the diverse emco Group, the parent company of Novus Tools, which employs over 1,300 people worldwide.

Get excellent results quickly and easily!

Novus is a German manufacturer of professional tackers for construction sites and workshops. We have been continuously improving our tackers since we first launched them in 1950, and our engineers are always developing innovative product features to make your job easier.

We are committed to helping people effortlessly achieve their goals – whether in their professional projects or their hobbies. To do this, we develop and produce high-end tackers that offer innovative “German engineering” of the highest standard.

Specific product features for precise results

A long nozzle allows precision working even in hard-to-reach spots, and the variable distance holder keeps staple lines parallel.

Long-term ergonomics

Ergonomic grips make our tackers easy to handle, while their perfectly balanced centre of mass means you can work comfortably even over long periods of time.

Fast and effortless – 3 fires per second

The rapid-fire function in our new cordless tackers lets you fire more than three times per second.

Durability for sustainability

Durability and a long service life – the hallmarks of Novus tackers. “German engineering”, selected materials, precise workmanship and seamless quality checks stand for tools you’ll love to use.

Meet any challenge with ease!

Not all tackers are the same, so some will be better suited to your task than others. This brief overview of the different types of tackers will help you to find the right tool for your project.

Electric tackers automatically electrically fire staples after release, making them perfect for more time-consuming jobs.

Cordless tackers can be used universally and in any location. What's more, they offer the high-performance benefits of an electric tacker.

Hand tackers are for universal use by tradespeople, for DIY and household projects.

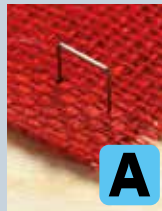

Hammer tackers are perfect for jobs where you are looking for speed over precision.

Always the right staple!

Once you have determined what material you need to tack, you can use the pictograms to find the right staple and the proper tool. The straightforward colour coding system on our products, our staples and on the shelf makes it easy for you to see which tacker works with which staples. So finding the right product is child's play.

What material will you be tacking?

Pick the right staples for your material ...

... and finally, pick the perfect tool.

Fabric/cloth

A **H**

Fine wire staple

Thinner staples hold materials securely in place without causing damage.

Sheeting

D **G**

Flat wire staple

The wide back of these staples prevents tearing and keeps sheeting securely in place.

Tongue-and-groove boards/panels

C

Narrow crown staple

Perfect for fastening tongue-and-groove boards, panels, fibreboards and wire mesh.

Decorative moulding

E

Nail

Our nails offer a simple solution for attaching decorative moulding and other wood types. The small head is both discreet and secure.

THE NEW GENERATION

Structured, rubber handle for **ergonomic grip**

Impact force adjustment
for softwood or hardwood

Robust and durable **metal housing**

Belt hook,
attachable on either side

The machined design line indicates the **staple exit** so you can place your staples with precision.

The long **precision nozzle** allows for precise working even in hard-to-reach places.

The **staple window** displays the current fill level.

The **distance holder** helps you create parallel lines of staples at a uniform distance from the edge.

Easy to use thanks to integrated staple pusher for quick staple reloading. All parts are firmly attached to the tacker and cannot be lost.

J-50

A H E

Item no.: 030-0449

Weight: 0.63 kg

EAN: 4009729078402

Powerful professional tacker for perfectly fastening a wide variety of fabrics, textiles and decorative mouldings on building sites and in workshops.

- Suitable for fine wire staples up to 14 mm and nails up to 16 mm
- Suitable for hammer tacker staples type H
- Long nozzle for precise working even in hard-to-reach places
- Distance holder for inserting parallel lines of staples at a uniform distance from the edge
- Ergonomic softgrip lever for comfortable working
- Opening for staple level indicator
- Sturdy belt hook for clipping to work clothes so device is always easily to hand
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Bottom-loading mechanism with integrated staple pusher for quick staple reloading. All parts are firmly built in to the tacker and cannot be lost
- Guarantees the right impact force for any job, on softwood or hardwood, thanks to mechanical impact force adjustment
- Space-saving handle lock for safe storage when not in use
- Available individually or as a set including staples and a case

J-50 case set includes 3,600 type A staples

A H E

Set no. 030-0469

J-51

D G E

Item no.: 030-0450

Weight: 0.63 kg

EAN: 4009729078426

Powerful professional tacker for perfectly fastening a wide variety of sheeting and decorative mouldings on building sites and in workshops.

- Suitable for flat wire staples up to 14 mm and nails up to 16 mm
- Suitable for hammer tacker staples type G
- Long nozzle for precise working even in hard-to-reach places
- Distance holder for inserting parallel lines of staples at a uniform distance from the edge
- Ergonomic softgrip lever for comfortable working
- Opening for staple level indicator
- Sturdy belt hook for clipping to work clothes so device is always easily to hand
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Bottom-loading mechanism with integrated staple pusher for quick staple reloading. All parts are firmly attached to the tacker and cannot be lost
- Guarantees the right impact force for any job, on softwood or hardwood, thanks to mechanical impact force adjustment
- Space-saving handle lock for safe storage when not in use
- Available individually or as a set including staples and a case

J-51 case set includes 5,000 type G staples

D G E

Item no.: 030-0470

Weight: 1.3 kg

EAN: 4009729082577

J-29

Powerful professional tacker with zinc die-cast housing for all kinds of work around the house and DIY jobs in the workshop.

- Suitable for fine wire and flat wire staples from 6 to 14 mm and nails up to 16 mm
- Suitable for hammer tacker staples type H and G
- Slide mechanism makes it easy to switch between fine wire staples and flat wire staples
- Ergonomic softgrip lever for comfortable working
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Distance holder for inserting parallel lines of staples at a uniform distance from the edge
- Long nozzle for precise working even in hard-to-reach places
- Bottom-loading mechanism with safety lock release for quick reloading
- Correct impact force for softwood or hardwood

Item no.: 030-0467 Weight: 0.969 kg EAN: 400972908278

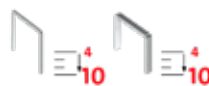

J-25

Small professional tacker with long-lasting, especially low-kickback zinc die-cast housing for a wide variety of jobs for home or DIY projects and workshops.

- Suitable for fine wire and flat wire staples from 4 to 10 mm
- Suitable for hammer tacker staples type H and G
- Slide mechanism makes it easy to switch between fine wire staples and flat wire staples
- Ergonomic softgrip lever for comfortable working
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Bottom-loading mechanism with safety lock release for quick reloading

Item no.: 030-0468 Weight: 0.645 kg EAN: 4005729082492

J-17

Our large hand tacker with premium ABS plastic housing for universal use.

- Suitable for fine wire and flat wire staples from 6 to 14 mm
- Slide mechanism makes it easy to switch between fine wire and flat wire staples
- Ergonomic softgrip lever for comfortable working
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Bottom-loading mechanism with safety lock release for quick reloading
- Correct impact force for softwood or hardwood

Item no.: 030-0438 Weight: 0.451 kg EAN: 4009729058398

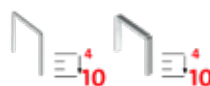

J-15

Our small general-use tacker for interior decorating and crafting.

- Suitable for fine wire and flat wire staples from 4 to 10 mm
- Suitable for hammer tacker staples type H and G
- Slide mechanism makes it easy to switch between fine wire and flat wire staples
- Ergonomic softgrip lever for comfortable working
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Bottom-loading mechanism with safety lock release for quick reloading

Item no.: 030-0441 Weight: 0.25 kg EAN: 4009729068168

J-13

Our small hand tacker with premium ABS plastic housing for universal use.

- Suitable for fine wire staples from 4 to 10 mm
- Suitable for hammer tacker staples type H
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Bottom-loading mechanism with safety lock release for quick reloading

Item no.: 030-0435 Weight: 0.244 kg EAN: 4009729057308

J-11

Our simple hand tacker made from ABS plastic for occasional household or garden use.

- Suitable for fine wire staples from 4 to 8 mm
- Handle lock for safe storage when not in use
- Opening for staple level indicator
- Bottom-loading mechanism with safety lock release for quick reloading

HAMMER IT HOME

Robust and durable
full-metal hammer tacker

Ergonomic non-slip grip
for safe handling and
fatigue-free working

Wide **baffle plate** for optimum
surface protection and for preventing
damage to tacker materials

All parts are **firmly attached**,
making them impossible to lose

Integrated staple pusher
for quick staple reloading

Opening as a
staple level indicator

High capacity
(two rows of staples or 175 staples)
for easier, faster and less frequent reloading

J-044

Large hammer tacker for professional use on construction sites.

- Suitable for flat wire staples from 6 to 12 mm
- Robust and durable full-metal hammer tacker
- All parts are firmly attached to the tacker and cannot be lost
- Non-slip grip for safe handling and fatigue-free working
- High charge capacity for less frequent recharging
- Wide baffle plate for optimum surface protection
- Fast reloading at the touch of a button
- Opening for staple level indicator

Item no.: 030-0453 Weight: 0.977 kg EAN: 4009729082102

J-033

Robust hammer tacker for universal use on construction sites.

- Suitable for flat wire staples from 6 to 10 mm
- Robust and durable full-metal hammer tacker
- All parts are firmly attached to the tacker and cannot be lost
- Non-slip grip for safe handling and fatigue-free working
- Integrated staple pusher for fast reloading

AN ABSOLUTE PRO

Protective rubberised front.

Structured rubber grip for ergonomic handling.

Impact force adjustable for softwood or hardwood.

Extra long 3 m cable for working on ceilings.

A rubberised design line indicates the **staple exit**, making it easy to place your staples exactly where you want them.

The long **precision nozzle** allows for precise working even in hard-to-reach places.

The **staple window** displays the current fill level – at a glance.

The **distance holder** helps you insert parallel lines of staples at a uniform distance from the edge.

Fast reloading thanks to integrated staple pusher.

J-150

Professional electric tacker for perfectly fastening a wide variety of fabrics, textiles and decorative mouldings on building sites and in workshops.

- Suitable for fine wire staples up to 14 mm and nails up to 16 mm
- Suitable for hammer tacker staples type H
- Long nozzle for precise working even in hard-to-reach places
- Distance holder for inserting parallel lines of staples at a uniform distance from the edge
- Ergonomic design for comfortable use
- Extra-long 3-metre cable allows you to work comfortably even in elevated locations
- Opening for staple level indicator
- Rubberised front protects delicate materials
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Bottom-loading mechanism with integrated staple pusher for quick staple reloading. All parts are firmly attached to the tacker and cannot be lost
- Electric impact force adjustment guarantees the right impact force for any job, whether softwood or hardwood

- Work even faster with the rapid-fire function – 3 fires per second
- Ergonomic device design allows you to work comfortably with an ideal center of gravity even when working overhead
- Depth setting: knurled screw to set distances of up to 2 mm between back of staple and workpiece. Staples are always inserted to the optimal depth, no matter how hard or soft the material
- Distance holder for inserting parallel lines of staples at a uniform distance from the edge
- CAS rechargeable battery system: powerful Cordless Alliance System 18 V Li-ion battery, compatible with all professional rechargeable battery products from other CAS partners
- Bottom-loading mechanism with integrated staple pusher for quick staple reloading. All parts are firmly attached to the tacker and cannot be lost
- Opening for staple level indicator
- Sturdy belt hook for clipping to work clothes so the device is always easily to hand
- Handy LED light to illuminate the work site
- Long nozzle for precise working even in hard-to-reach places
- Rubberised front protects delicate materials
- For accurate results, the design line on the front of the tacker indicates the exact location of the staple exit
- Blank firing guard means staples are only released when tacker is in contact with material

CAS

Working with different brands?
Easy with a CAS rechargeable battery.

CAS charger SC 30

Charger for CAS Novus 18 V rechargeable battery and all other Li-Ion or LiHD slide-in rechargeable battery packs from the Cordless Alliance System (CAS), whether 2.0 Ah, 4.0 Ah, 5.2 Ah or 8.0 Ah.

- Fits all CAS slide-in battery packs 12 V – 14 V
- The patented Air Cooled charging technology cools the battery pack while charging, protecting the cells

Item no.: 031-0368

EAN: 4009729079362

CAS rechargeable battery 18 V 2.0 Ah

The 18 V 2.0 Ah CAS rechargeable battery not only offers full flexibility for Novus cordless tools, it is also 100% compatible with over 300 machines.

- CAS 18 V LiHD rechargeable battery with 2.0 Ah by Metabo
- Fits our cordless tackers J-550 / J-551
- One charge will last for approximately 3,000 fires
- With charging level indicator
- Patented "AIR COOLED"-charging technology

Item no.: 031-0367

EAN: 4009729079348

J-214 Li-Ion

Our pneumatic tacker with lightweight metal housing for professional upholstery and decorating work.

- Suitable for fine wire staples from 6 to 16 mm
- Precise Nozzle: long nozzle for precise working in hard-to-reach spots
- Electric Power Control: correct impact force for softwood or hardwood
- Safety lock: instantly ready to use once you release the trigger guard
- Silencer: attenuates sound for low noise levels
- Quick Loading System: integrated staple pusher for fast reloading
- Provided in practical case including Novus 3.6 V rechargeable battery and charger

Novus fasteners – quality that holds up!

Novus offers the right size and length of fastener for every task, made with state-of-the-art technology and using only the best materials. Novus fasteners are manufactured exclusively from steel wire with a galvanised coating to ensure maximum environmental sustainability and exceptional rust protection.

The stainless-steel V2A staples are particularly suitable for continuous outdoor use. “Superhard” refers to a steel wire of the highest strength, indicating the stability of the staple.

Staple length

The right staple length ensures you are always on the safe side. You should use 1/3 of the staple length for the fastening material and 2/3 for the anchoring material. If you are using a hardwood as the anchoring material, a 1/1 ratio is sufficient.

All our staple packaging is completely plastic-free and made of recyclable cardboard.

Large pack

Easy to handle and re-close for large projects.

Sliding box

The sliding box is easy to open and close, with a window that reveals its contents.

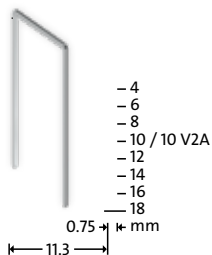

Fine wire staple

Perfect for fastening:

- Materials/textiles
- Thin metal tags
- Wire mesh
- Thin wooden slats

The staples dimension from different manufacturers may differ.
Novus assumes no liability for the use of staples from other manufacturers.

As a specialist for fastening technology, Novus offers a range of rivet pliers and blind rivet nut pliers. Whether you're mounting signs or fastening accessories to vehicles, home and garden devices, leather items or children's toys: wherever you need a strong, reliable fastening and you can only access one side of the material, riveting technology is the answer.

Rivet pliers

The rivets provide a secure and reliable hold even where they are exposed to constant vibrations.

Handy partners for firm connections

Blind rivet nut pliers allow you to use screw threads even in hard-to-reach places.

Blind rivet nut pliers

Number plates can be switched out effortlessly thanks to the thread in the rivet nut.
